

# VOLVO FE CNG

Compressed Natural Gas

**The new Volvo FE CNG (Compressed Natural Gas) is a low-emission truck that has been primarily developed for operations that involve short driving cycles with repeated stop and starts such as refuse collection and local distribution.**

**NEW BUSINESS OPPORTUNITIES.** The business case for the Volvo FE CNG is compelling. By using compressed natural gas Volvo Trucks can now offer you the benefits of economical performance, an appreciable lowering of emissions and low noise. So now you can confidently compete for urban contracts knowing that with the Volvo FE CNG you are more than able to meet regulations used to protect most inner-city environments.

**REDUCING EMISSIONS.** The Volvo FE CNG is fitted with a gas-powered engine that conforms to the Euro 6 emission regulations and reduces carbon dioxide emissions. It perfectly demonstrates Volvo Trucks' long term commitment to make sustainable transport solutions that have minimum impact on the environment – better for people and better for business too.

**EVEN MORE UPTIME.** Thanks to the Volvo FE CNG's advanced gas-powered engine design your truck requires less day-to-day maintenance and gives you the benefit of longer service intervals. And with Volvo's widespread support network, and the opportunity to benefit from a Service Contract, you have the added peace of mind of knowing that Volvo's there when needed.

The Volvo FE CNG engine conforms to the Euro 6 emission regulations.

Compressed Natural Gas

## Specification Volvo FE CNG

- 4 x 2, 6 x 2 rigid configuration
- 9-litre Euro 6 gas engine 320 hp /1350 Nm torque
- Automatic gearbox
- Gearbox retarder (option)
- 600/400 Nm PTO
- Operating range 80-400 km
- Day cab
- 2 x 4 or 2 x 3 tanks for Compressed Natural Gas fitted on both sides of the chassis
- WB 2500-4750
- Vertical exhaust

**FULLY AUTOMATIC GEARBOX.** You can smoothly and conveniently operate the automatic 6-speed transmission with push-buttons on the engine tunnel. By eliminating the need to constantly change gear, particularly welcome in stop and start situations, the driver is able to concentrate solely on steering the truck. Furthermore, the automatic gearbox helps protect the engine and transmission from unnecessary wear and tear by optimising power distribution to suit the prevailing conditions.

**OUTSTANDING POWER ON DEMAND.** As a mono-fuel engine (it is gas-powered only) the 9-litre Euro 6 powertrain fitted with advanced spark plug technology produces 320 hp and 1350 Nm of torque. The smooth power delivery gives the Volvo FE CNG excellent driving characteristics and makes it the ideal truck for negotiating the twists and turns of congested city roads.
